The Single Collateral Management Rulebook for Europe (SCoRE) contains 15 Standards related to the processing of corporate actions (published as the [SCoRE Standards for Corporate Actions](#)). This NSG summary report is structured as follows: The Executive Summary provides an overview of the responses received per Entity Type i.e. CSD, TPA, Custodian etc. Section 1 presents the compliance status of each entity type. Section 2 provides an overview of the progress against the individual milestones. Section 3 then provides a more detailed overview of the implementation status per Standard for each entity type.

Executive Summary

The overall implementation of the Corporate Actions Standards in the German market is mostly on track, however, a more detailed view shows a mixed image.

Clearstream Banking Frankfurt as CSD has already implemented 27.1% (as compared to 45.1% in H1 2021) of the corporate action standards. This decrease in compliance is due to the inclusion of several new items requiring compliance under the rulebook. This has required further analysis for the purposes of implementing the full, finalised rulebook with the remaining standards still in the process of such analysis.

For Clearstream Banking Frankfurt as TPA, standard one is the only relevant corporate action standard. All related sub-standards are still in the process of analysis.

Clearstream Banking Frankfurt has not met the current Milestone 3 (Analysis Completed). It will reach this milestone by December 2021. It is also envisaged that Milestones 5 and 7 will also not be achieved according to the timeline specified by the AMI-SeCo. They expect to meet Milestone 5 (Detailed External Communication) by March 2022 and Milestone 7 (SCoRE Adaptation Complete) by September 2022. All other milestones are still on track.

The implementation status of German custodians varies - depending on the specific standard - within the range of between 59% and 88%.

The majority of custodians confirm that they will meet the targets as specified by the AMI-SeCo's milestones.

The majority of issuers confirm awareness of their obligations.

Notes:

- For CSDs and TPAs the colour-code reflects the current implementation status of each Standard in accordance with the methodology outlined in Box 1 above.
- TPAs are using custody services provided by CSDs or Custodians in order to disseminate CA information to Collateral Givers and Collateral Takers. Monitoring of TPAs thus focuses on the implementation of triparty specific workflows described in Standard 1.
- For custodians the % indicates that the standard has either already been implemented, or that implementation is on track i.e. at a minimum that analysis has already started or that implementation has started per Standard.
- Issuers were asked to confirm awareness of their obligation to provide all relevant information to the Issuer CSD (on a Yes/No basis). The % reflects the number of issuers who responded yes to the survey
- Percentages are calculated on the basis of expected respondents, i.e. number of entities monitored in the market.
- A plausibility check was performed by the CMH-TF Secretariat.

Milestones expected to be achieved in the current reporting period are highlighted in blue in the header of Table B below. The blue colour-code is then assigned to those milestones which have been successfully achieved to date for each respective entity. Milestones which will only be achieved later are assigned a yellow status, while milestones which will only be achieved with significant delays / where work has not yet commenced are marked in red.

For the remaining milestones (i.e. milestones due to be achieved only after the current reporting cycle) the colour-code indicates an entity's expected ability to achieve a future milestone on time. The expected date of achievement is also indicated in the table if it is different to the milestone date defined by the AMI-SeCo.

Clearstream Banking Frankfurt provided the following information:

“For some questions, answers are not yet known or cannot be provided in set. In this case we have indicated 'still under analysis', 'TBA' or '0%'. Due to the very late adoption of most standards, and the continued discussions on those standards not yet adopted. As a result, we have taken an approach that as our analysis in general is still ongoing, we have provided this answer as default wherever a previous answer was not given.

In terms of our overall progress and readiness, we are still analysing the standards and completing our high level business requirements, and intend to start development by 10.01.2022.”
